

Documentation

This is the help page for how to use the site

These are going to be the 7 thing you will see on the front of this web page after you have successfully signed in via Google.

This page will cover each of them and how to use/deal with them accordingly.

Home

First will be HOME, this will be as the name suggests, the home page.

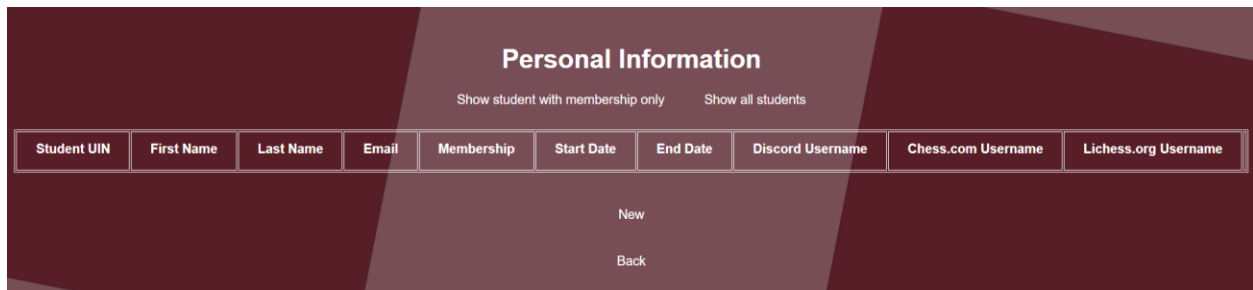

This will be where you can access any of the features the site has to offer and navigate easily between the many parts.

This is the simplest page as it serves as a hub or, funny enough, home page.

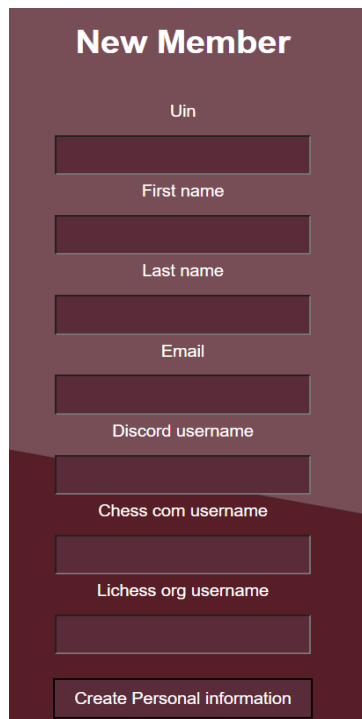

Personal Information

Next is PERSONAL INFORMATION, this tab keeps track of all the members information.

There are 2 pages you can see, one is the base form that should be accessible via a QR code, and the URL is personal information/new this does not require one to be signed into the application to be able to make an account.

A vertical form titled "New Member" with a dark blue background. It contains eight text input fields stacked vertically, each with a label above it: "Uin", "First name", "Last name", "Email", "Discord username", "Chess com username", and "Lichess org username". At the bottom is a button labeled "Create Personal information".

New Member

Uin

First name

Last name

Email

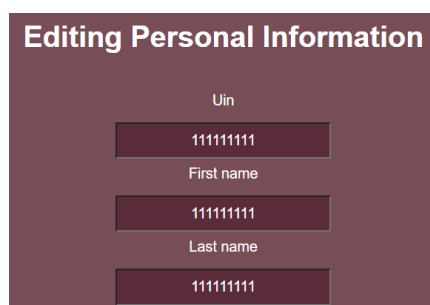

Discord username

Chess com username

Lichess org username

Create Personal information

The next is the form you can see when you hit edit. This has the dates and the membership checkbox on, so you as an admin can change these values only change the membership value not the start and end dates, they are auto generated by the sites backend. When you click on the personal information tab in the homes page you can see that there is a base view, this takes in a UIN, First Name, Last Name, Email, Discord Username, Chess.com Username, and Lichess Username.

A vertical form titled "Editing Personal Information" with a dark blue background. It contains four text input fields stacked vertically, each with a label above it: "Uin", "First name", "Last name", and "Email". Each field contains the text "11111111".

Editing Personal Information

Uin

11111111

First name

11111111

Last name

11111111

Everything except the last two must be entered. Also be wary, we only check for accurate looking inputs, not actually working inputs so if one doesn't work assume it is incorrectly entered. You as an admin can edit any of these values but I would recommend not doing that unless you have too. At the end of each edit and creation there should be a create information button or

update button and that confirms the changes/creations.

Click to Sort

Attendance

Below that is the ATTENDANCE page, this is one of the simpler pages.

This page has a graph that covers the entire semester, so the more dates and meetings the more that appears on the graph.

To access a new Attendance form you hit the new button
or the URL is attendances/new which takes you to a page with just a UIN box that is empty and
and create attendance button.

The screenshot shows a web interface titled "New Attendance". It features a form with a "Uin" input field, a "Create Attendance" button, and a "Back" button.

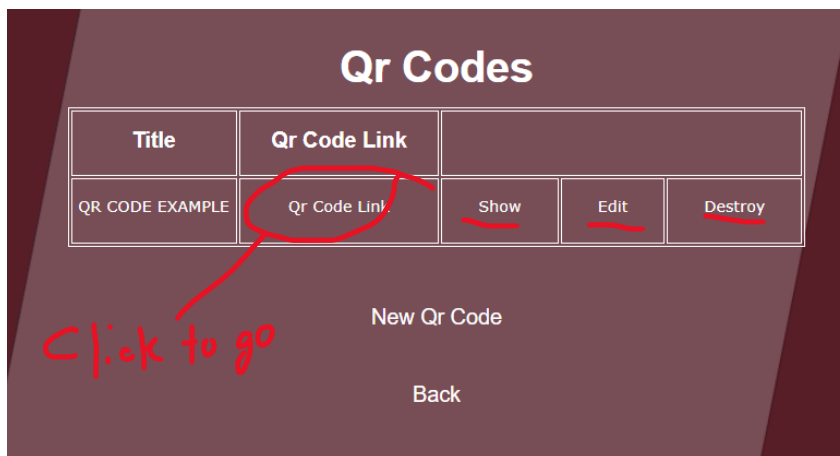

Also, you can delete specific attendances however, this is a feature
as well as editing them so if a date is off or a UIN is wrong you can change it.

The screenshot shows a web interface titled "Editing Attendance". It features a form with a "Uin" input field, a "Day of event" input field, an "Update Attendance" button, and "Show" and "Back" buttons.

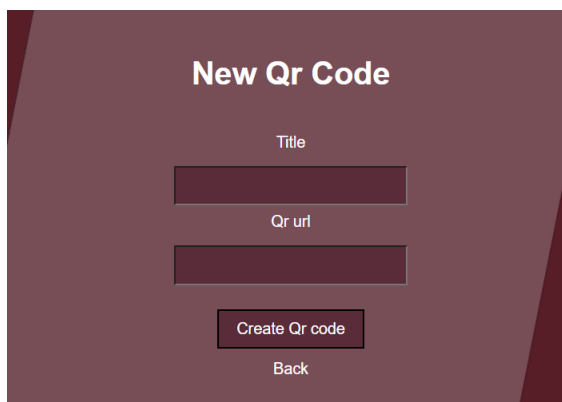

QR Code

Next on the list is the QR CODE page, this page is almost as simple as the attendance page.

There is a new button click it to make a new entry. Then make a title this will house the reference to where or what the link will take you to. All links have the same name as some links are long URLs and others short. Host the QR.

code or images on a 3rd public site and

then link the URL in the URL box. Then click create. This hosts any link so be careful there

should be a show option to show the entire link so you can check and make sure the link is

valid or untampered with. BE CAREFUL as any site can be linked in this

Player Statistics

Following that is statistics, all you must do is click update and wait.

this reloads the table it can take some time, but it should take all current accounts

made for the current semester and load them into the table.

Statistics									
Name	UIN	Chess.com username	Blitz	Rapid	Total played	Lichess.org username	Blitz	Rapid	Total played
111111111 111111111	111111111	111111111	548	-1	318	111111111	2300	1500	425
222222222 222222222	222222222	222222222	-1	-1	0	222222222	1481	1561	384

Update

Back

If there is a 0 for the account, then it means they did not enter in any username in their account for that specific site.

If there is a -1 it means either the account is wrong as in it is entered by wrong, or

they have not played any games in that specific area. Lastly and number above 0 is accurate accordingly

to the site they entered their username for. People can also put any name of any account in their profile so be careful about that. This is based off integrity of the user, which is not good, but we don't validate

Statistics									
Name	UIN	Chess.com username	Blitz	Rapid	Total played	Lichess.org username	Blitz	Rapid	Total played
111111111 111111111	111111111	111111111	548	-1	318	111111111	2300	1500	425
222222222 222222222	222222222	222222222	-1	-1	0	222222222	1481	1561	384

Update

Back

account information so this should be fine for now. This page is most prone to errors as users can enter in

any possible username so certain ones using non number and letter characters will error occasionally. If you get

this page to error after an entry, then check the personal information table and see if any usernames have nonnumeric

and alphabetic numbers if it doesn't use the edit to fix it.

Documentation

Second to last is Documentation, the page you are currently on if you are reading this.

Sign Out

Lastly is the Sign Out page this is to sign out of admin thereby exiting the site.
